Projects

- Enforcemental and connectivity among populations of Antarctic manner organisms (Characteristics) amonator. Proving presents antarcticum. Characteristics app., Exphanism agreemen.
- assirativi, Previngemma Interspouri, Chopostroni apri, Esphiesse seprime:

 Differentiation and connectivity in estuance and coastal organizes (Catomic season). Chamerica.
- Exmanded in periodics and entirings of the European and Emillione
- Triaceparence and announcemental genomics of non-model organisms (Augusta anquella, Chamicinant hamates Chamices patient)
- Providiori peretios. Autoriosi and contimposary procesaes in communisti fian spécies i Prumous
- Prynting Districts began began Statement accepted.

 Consequence contains and management of casting constitutions of the criticals and districts.
- durgeon (Argument rescard) for the establishment of an in-situ treating program
- Analyses of the inventorior pattern in weaponst persones.
- Application of 454 next generation projections to the framerlystene characterization of sturgeon species with different prigners of plainty.
- Application of classical periods approaches and of <u>Burning least AAD personnel</u> in the identification of applicas aparolic penaltic markets suitable for species identification.
- . Manthance and characterization of Tot die transpools elements in the Marjauri personal
